

Annual Report of Agriculture

COUNTY OF MERCED

1958

**Merced County
Department of Agriculture**

To: W. C. Jacobsen, Director
State Department of Agriculture
and
The Honorable Board of Supervisors.

In accordance with the requirements contained in Section 65.5 of the Agricultural Code, I submit this report, calculated on a farm value basis, of acreage, production, and value of agriculture in Merced County, for the calendar year of 1958.

The reduction in alfalfa acreage is largely offset by increased plantings of permanent pasture. Alfalfa yields were above normal, and likewise cotton which has increased from .8 bale in 1949 to a high of 1.88 this year. Staple was somewhat shorter. Harvest conditions were nearly ideal for cotton and rice. Yields of grain generally were below average due to excessive spring rains followed by sudden hot weather. Planting of field corn continues to increase.

Production of certified seed is gaining in importance with alfalfa leading, followed by hybrid corn and other cereals. Vegetable seeds are grown largely under contract with seed processors and distributors.

Heavy rainfall in March and April delayed planting of early tomatoes. The early packing deal began July 3, as compared to June 15 - 20 in previous years. Cantaloupe acreage on the West side remains fairly constant.

Bearing and non-bearing fruit and nut crops are listed by variety. Inclement weather during the blooming period materially reduced yields of almonds and apricots. Figs remain a crop of major importance, despite a 50% pullout over the past 10-years. 65% of our grapes are of the Thompson seedless variety. Cling and freestone peach yields were somewhat higher than expected.

The number of dairy cows increased by 11.4%. More than one-half of all milk produced was Grade A. Prices of veal calves and older cows were up, following the trend of beef cattle. Feed lot operators finish a large number of beef cattle produced in this county. Turkey and chicken growers sold about the same number of birds, however low prices continued.

The information contained in this report was gathered by our staff and compiled by E. C. Fitchett, Deputy Commissioner. The cooperation and assistance of growers, handlers, and others in agriculture, made this possible, and to them we express our sincere appreciation.

E. A. Danison
Agricultural Commissioner

EAD:dhl
